Intelligent Access Management

A Brilliant Innovation in Healthcare Security.

The security needs of doctors' offices, clinics and other healthcare facilities are truly unique. Thankfully, so is **bright blue**™. It's an affordable, web-based access control system that gives you the optimum balance of control and accessibility. When you choose **bright blue** patients feel safe, visitors feel welcome and staff members have the freedom to quickly and easily go anywhere they're authorized. Best of all, you'll be able to monitor, control and change the system with incredible ease.

From installation and training, to system management and navigation, **bright blue** was designed to make every aspect of electronic access simple. Wherever patient security, HIPAA requirements and overall security are a must, **bright blue** provides a solution that's as easy to use as it is secure. This blue box is very bright, indeed.

Smart Access Management Made Simple for Your Healthcare Facility.

Easy to Install.

bright blue is preconfigured and network ready, so there's no software to install. Plus, easy-to-use wizards walk you through set up.

Easy to Learn.

With minimal training, you'll be up to speed on **bright blue's** user-friendly software interface. After all, in a healthcare setting, there's no time to waste.

Easy to Use.

bright blue lets you add, delete and manage users from any computer with an internet connection.

Easy to Afford.

bright blue is priced so even small healthcare facilities can afford it. And it immediately begins paying for itself, because there's no need to re-key locks or purchase a dedicated PC.

Easy to Love.

bright blue means electronic access control that's as secure as it is simple.
