# bright blue.

## Intelligent Access Management

**Bright blue** is a brilliant new innovation in access management from Schlage. It's a web-based access control system that gives you the freedom to access, manage, and oversee your facility's points of entry from anywhere. It's powerful. It's affordable. And it's easy to use.

With **bright blue**, you can log on from home or from halfway around the globe - anywhere there's Internet access. There's no need to install expensive software or use a dedicated PC. Everything you need is inside the blue box, just plug it into your existing network and power source. That's all it takes to start managing up to 32 devices and 5000 cardholders.

The more you learn about it, the more you'll agree smart has a new color. It's **bright blue**.
